

# Baby Jogging Stroller

## On the way with your Baby

Even the first trip home from the hospital is not possible without some basic equipment.

Even here you need an age-appropriate baby car seat to transport the little one safely.

For future walks and excursions, you will also need a variety of transportation options such as a stroller or a baby carrier.

If you are planning a vacation with your little one, the travel cot may become important at an early stage.

**Our tip:** Look for tested quality and safety in strollers and infant carriers. For this you can visit [babyjoggingstroller.com](http://babyjoggingstroller.com) for our buying guides, reviews and our Best strollers.
