

# Baby Jogging Stroller

## Baby's first outfit

### Body care

Bathing and grooming your little one takes some time. But it also gives you and your baby the opportunity to enjoy the closeness and strengthen your bond.

After the bath or while applying lotion, take time for a baby massage, do fun finger games, or sing to your baby. When buying bath or care products for your little one, "less is more." Pay attention to a careful dosage and natural and skin-friendly ingredients.

We have summarized the most important things for you here.
